

HABLTECH

**Scalable systems.
Secure architecture.
Measurable impact.**

We design and build enterprise-grade software engineered for performance, security, and long term growth.

 contact@habltech.com

 www.habltech.com

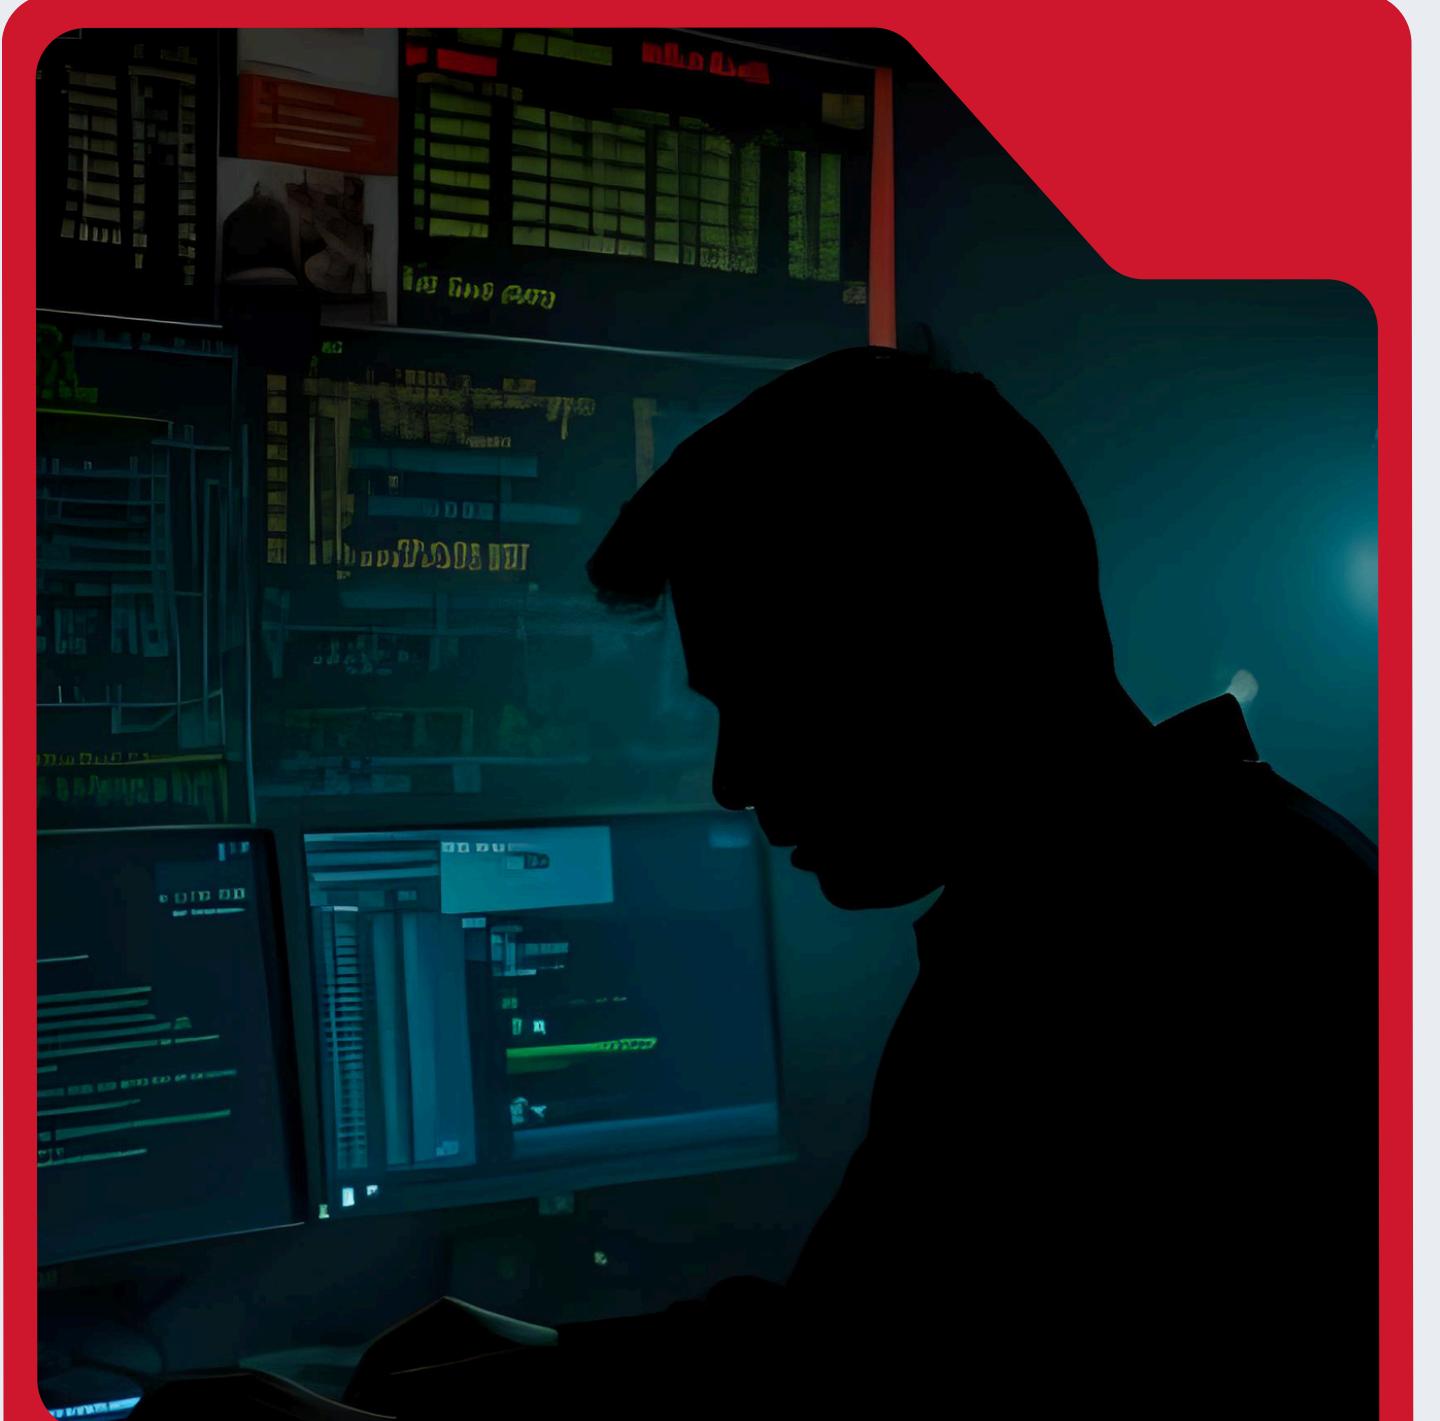

Technical Philosophy

“Every line of code we ship must create measurable business value.”

Our Engineering Principles:

- Modular, maintainable architecture
- CI/CD pipelines for continuous deployment
- Secure data handling and encryption
- Cloud-native, scalable infrastructure
- Clear documentation and transparency

CUSTOM SOFTWARE DEVELOPMENT

At HablTech, we specialize in crafting tailored software solutions that simplify complex business processes and drive digital transformation.

Our team of experienced engineers, UI/UX designers, and project managers collaborate to deliver systems that are secure, scalable, and designed for long-term growth.

LIBREBOOKING

RESOURCE SCHEDULING & RESERVATION

PLATFORM

INDUSTRY: SAAS / ENTERPRISE OPS

TECH STACK

C# (.NET Core) · ReactJS · SQL Server · Python (analytics)

Infrastructure

Azure App Service, Load Balancer, Blob Storage

Architecture:

- Multi-tenant web app with modular services
- Role-based access control + REST API layer
- Background jobs for conflict detection

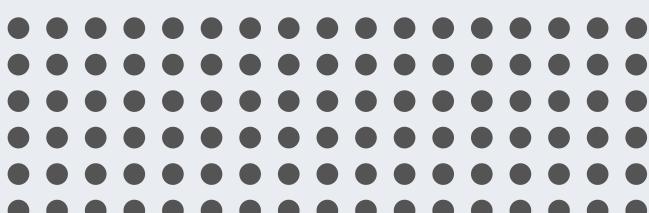

Result:

60% fewer conflicts

Real-time dashboards across 10+ departments

4.5★ user testing score

The screenshot shows the LibreBooking software interface. At the top, there's a header with the logo 'LibreBooking' and 'Company name LibreBooking'. Below the header is a navigation bar with links: Dashboard, My Account, Schedule, Check, Application Management, and Reports. On the left, there are icons for printer, star, and calendar. To the right of the calendar icon is a dropdown menu set to 'AUTOMATIZACIÓN Y CONTROL - NEUMÁTICA'. Below the navigation is a date range selector showing '02/09/2024 - 07/09/2024' with a link '(Show Full Week)'. A toolbar below the date range includes buttons for Open, Blocked, Reserved, My Reservation, Participant, and Pending. On the far right, there's a vertical scrollbar. On the left side of the main area, there's a 'Resource Filter' sidebar with sections for 'Filter', 'All Owner', 'Participant', 'Minimum Capacity', 'Resource Type' (set to 'All'), 'Tipo de prueba' (set to '--'), and buttons for 'Filter' and 'Clear Filter'. The main area is a grid showing resource availability over time. The grid has columns for 'Monday, 02/09/2024' through 'Tuesday, 03/09/2024' and rows for '00:00', '06:00', '08:00', '10:00', and '12:00'. Rows represent resources: 'Banco 01 - Neumática', 'Banco 02 - Neumática', 'Banco 03 - Neumática', 'Banco 04 - Neumática', and 'Banco 05 - Neumática'. Each resource row has five cells corresponding to the time slots. The first four cells for each resource are shaded red, while the last one is blue. The blue cells have text: 'Accionamientos neumáticos 673-241' for Banco 01, 'Accionamientos neumáticos 673-241' for Banco 02, 'Accionamientos neumáticos 673-241' for Banco 03, 'Accionamientos neumáticos 673-241' for Banco 04, and 'Accionamientos neumáticos 673-241' for Banco 05. The last column for each day also has text: 'Neumática e hidráulica 577-264' for Monday and 'Neumática e hidráulica 577-264' for Tuesday.

OALAN DIGITAL BANKING & PAYMENT APP

INDUSTRY: FINTECH / BANKING

TECH STACK

Flutter · Node.js (Express) · PostgreSQL · Redis · AWS (Elastic Beanstalk, S3, RDS)

security

AES-256 encryption, JWT auth, 2FA via Twilio, role-based access control.

Architecture:

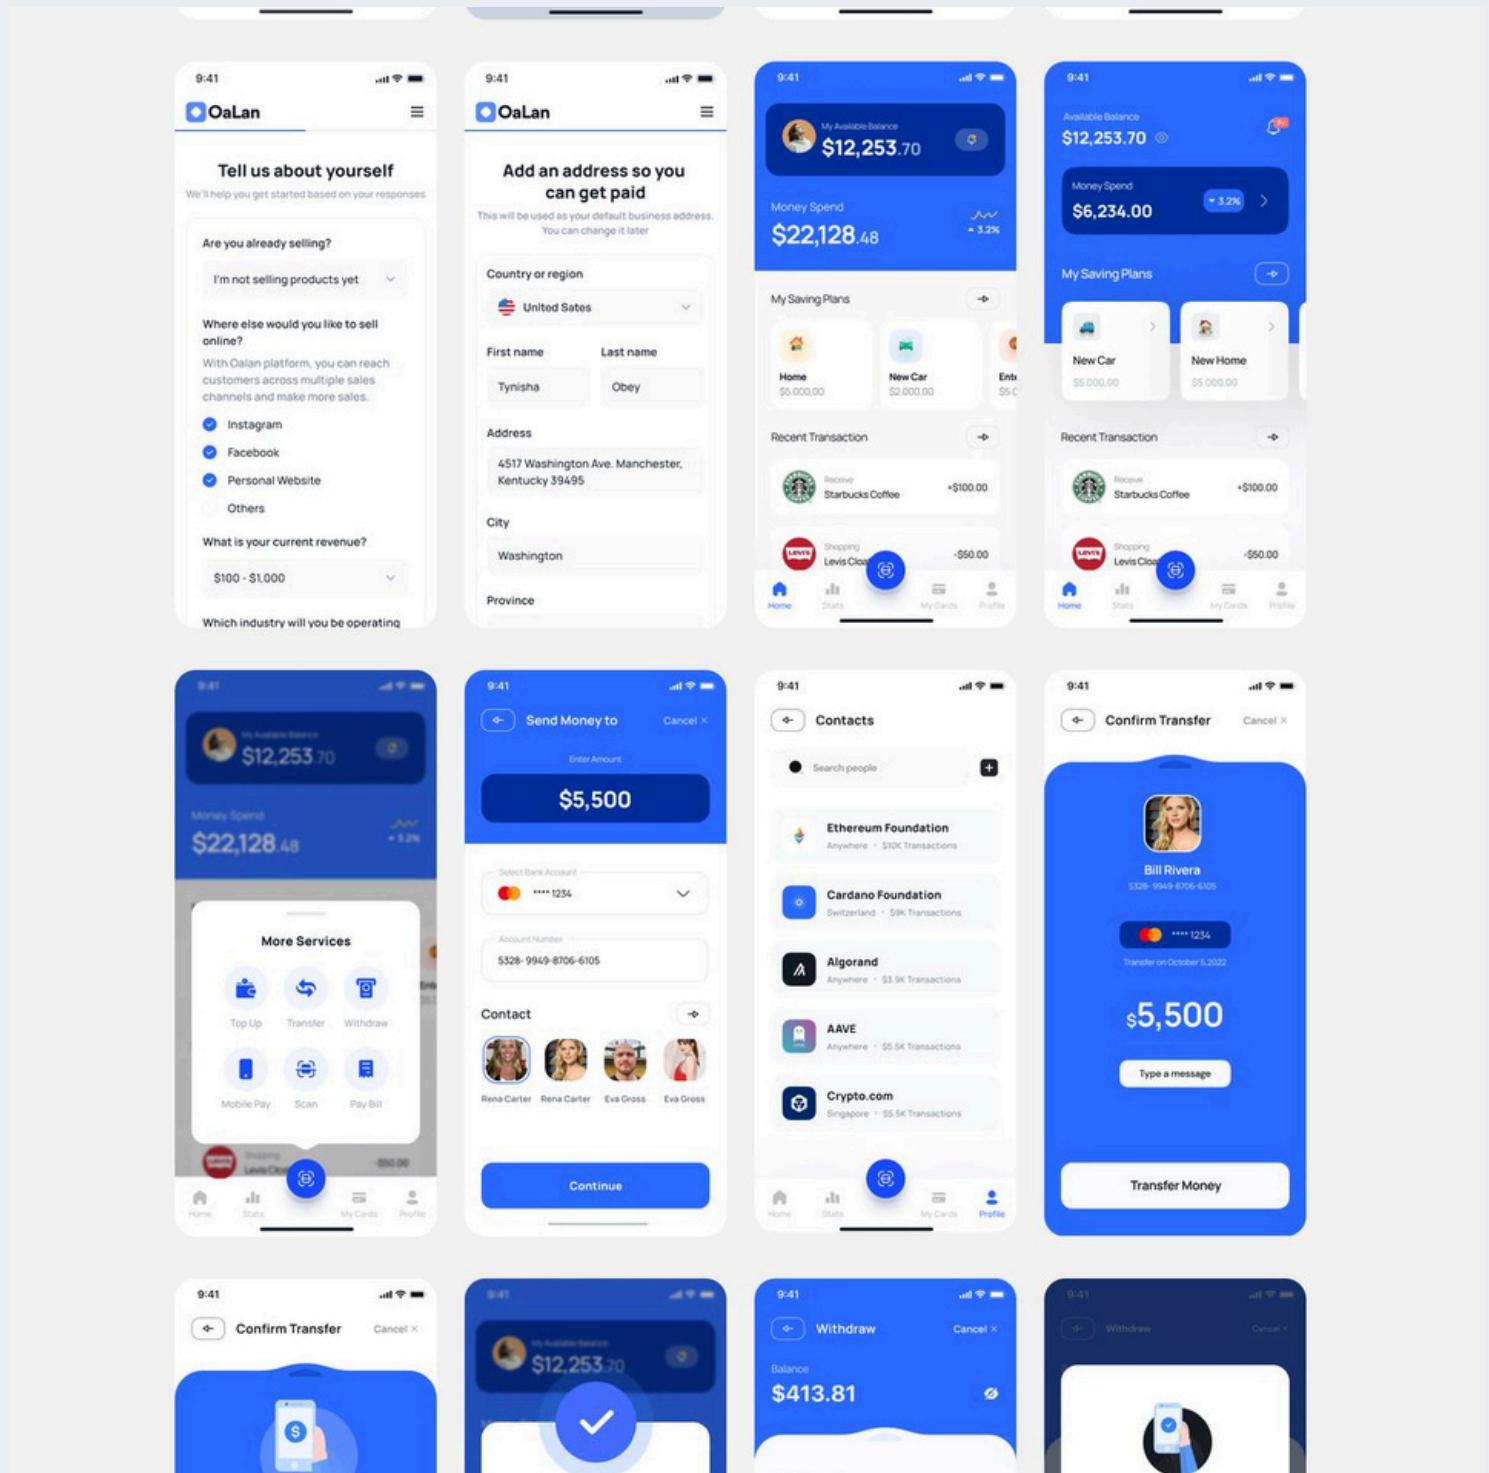

- Microservices-based backend (Node.js / Express)
- RESTful API gateway for mobile & admin clients
- CI/CD via GitHub Actions + Dockerized deployment

Result:

50K+ transactions/month

99.9% uptime

4.8★ user testing score

CAREA CAR RENTAL & VEHICLE MANAGEMENT APP

INDUSTRY: MOBILITY / TRANSPORTATION

TECH STACK

Flutter · Dart · Firebase · Node.js · MySQL

Infrastructure

Google Cloud + Firebase Hosting + Cloud Functions

Architecture:

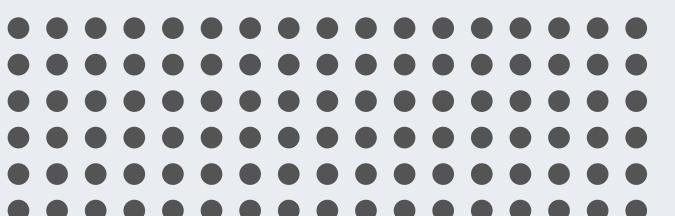

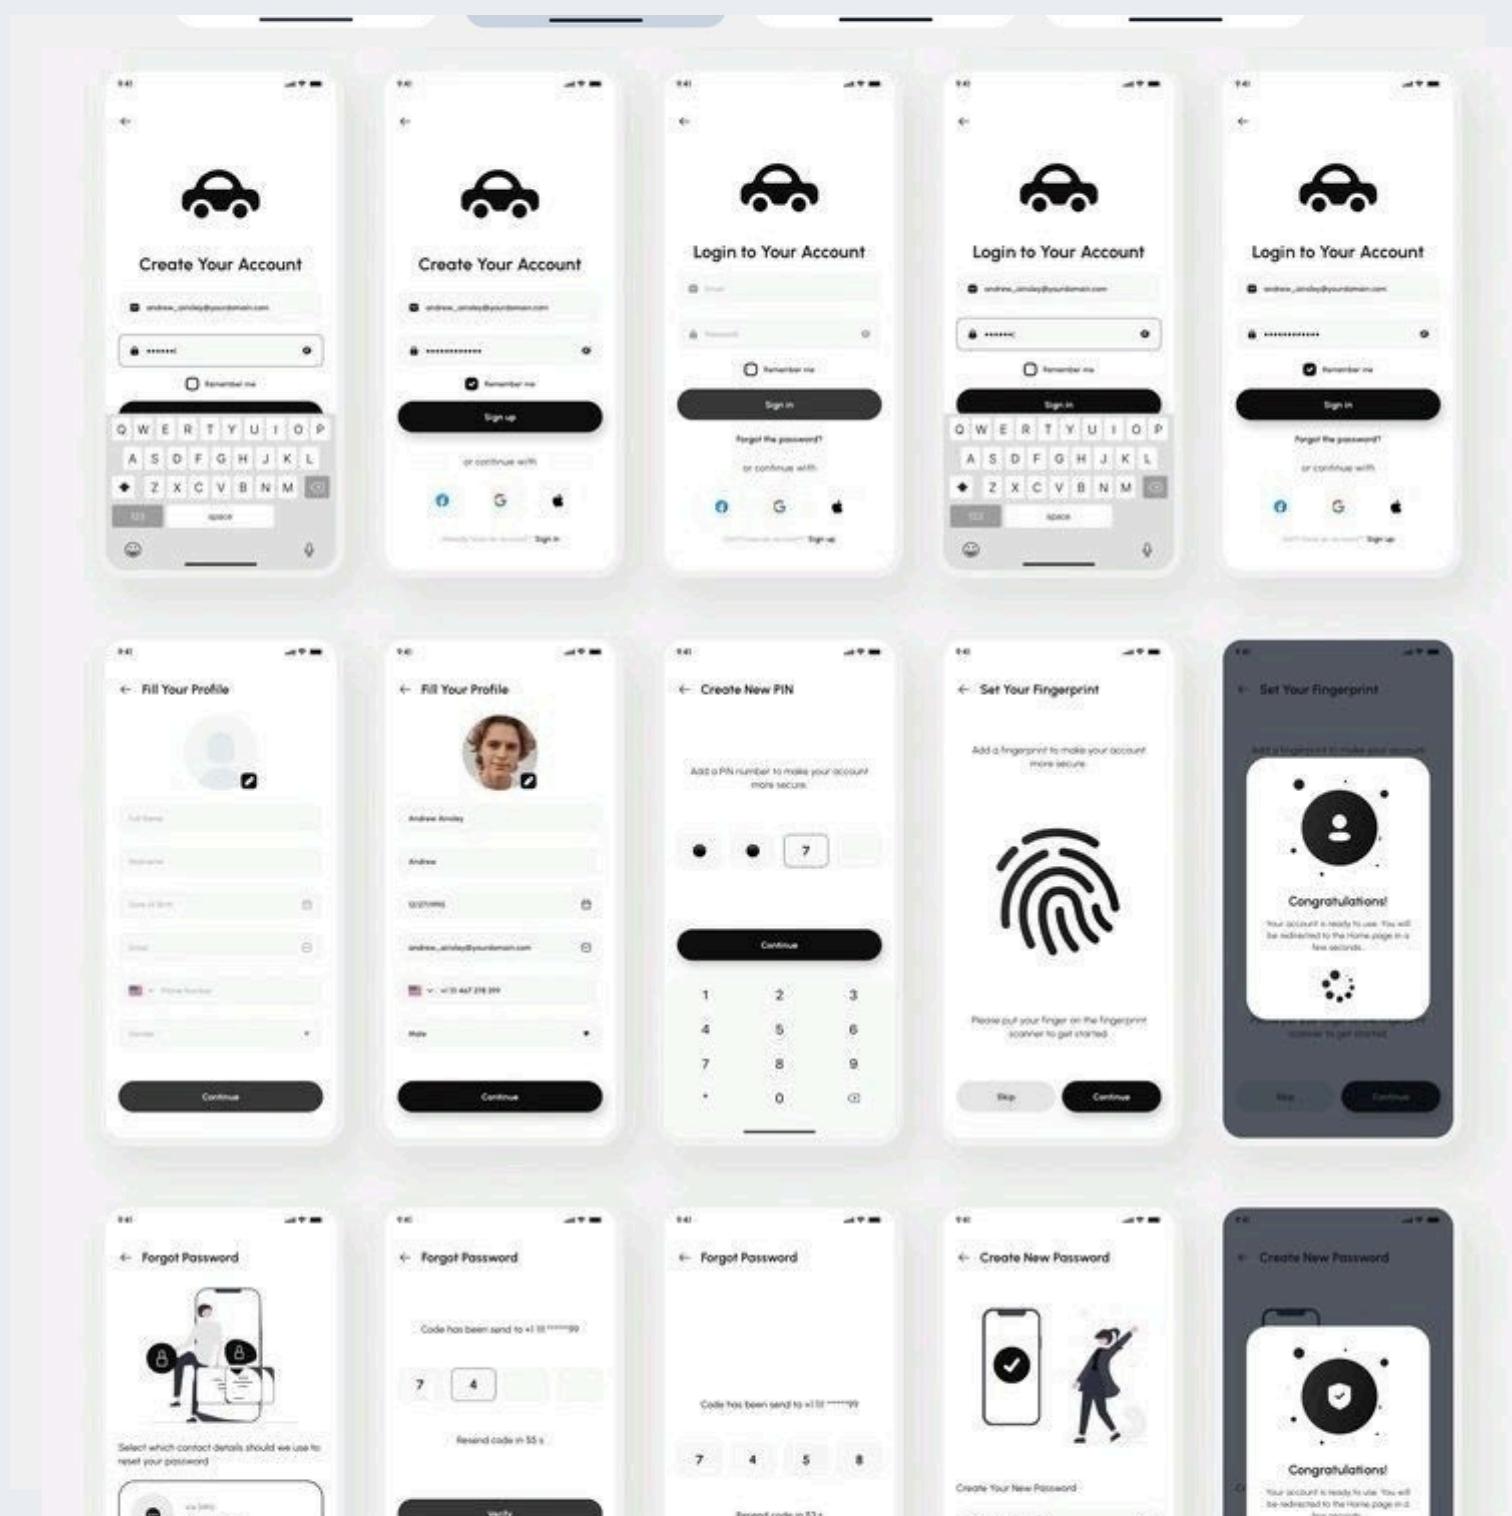

- Serverless setup for real-time car availability
- Secure Stripe payment integration
- Push notifications for bookings

Result:

35% faster bookings

24/7 live synchronization

4.2 ★ user testing score

SPRINTREPORT AGILE PERFORMANCE & ANALYTICS PLATFORM

INDUSTRY: SOFTWARE / DEVOPS

TECH STACK

ReactJS (Next.js) · Node.js (NestJS) · PostgreSQL · AWS EC2 · WebSockets

Infrastructure

AWS CloudFront + EC2 + S3, CI/CD with GitHub Actions

Architecture:

- Modular micro-frontend architecture
- WebSocket real-time updates
- Data pipeline integrated with Jira & GitHub APIs

Result:

40% faster sprint reviews

70% less manual reporting

4.7 ★ user testing score

The screenshot shows the SprintReport platform's user interface. At the top, there's a navigation bar with the SprintReport logo, powered by Balagile, Pricing, Contact Sales, Login, and a Sign Up button. Below the header, a large blue banner with white text reads "Finally a good tool for Scrum Masters." It includes a sub-section titled "Sprint Report App" with a brief description: "solves the problem of all ERP systems: it gives Scrum Masters a standardized, business compatible reporting tool with metrics and insights on team performance sprint by sprint – while it saves a ton of admin time. User stories, sprint data, finances, team events, log and performance trends & more." A "Get Started" button is located below this text. To the right of the banner, there are several screenshots of the platform's features: "Create New Sprint" (a table with columns Capacity, User Stories, Team Events, Finance, P/U Log, M/U Log), "Project Overview" (a table with columns Project Name, Status, Progress, and a "Details" button), and "Sprint Data" (a table with columns Story Points, Actual Points, and a "Details" button). Below these, a section titled "FEATURES" contains five icons with labels: "Beautiful Visualisations" (chart icon), "Trend and KPI Analysis" (trend line icon), "Taking Notes" (notepad icon), "Management Level Insights" (database icon), and "Hotspot for Info" (radio tower icon). At the bottom, a section titled "LEVEL UP & SYNCHRONISE" contains text: "Talk to your PO and management using the same, transparent data and get everyone on the same page." A "Get Started" button is also present at the very bottom.

BIZCORE ENTERPRISE MANAGEMENT DASHBOARD

INDUSTRY: SALES / CRM

TECH STACK

PHP (Laravel) · MySQL · JavaScript (Vue) · Docker · Nginx

Infrastructure

On-premise + AWS hybrid, CI/CD via Jenkins

Architecture:

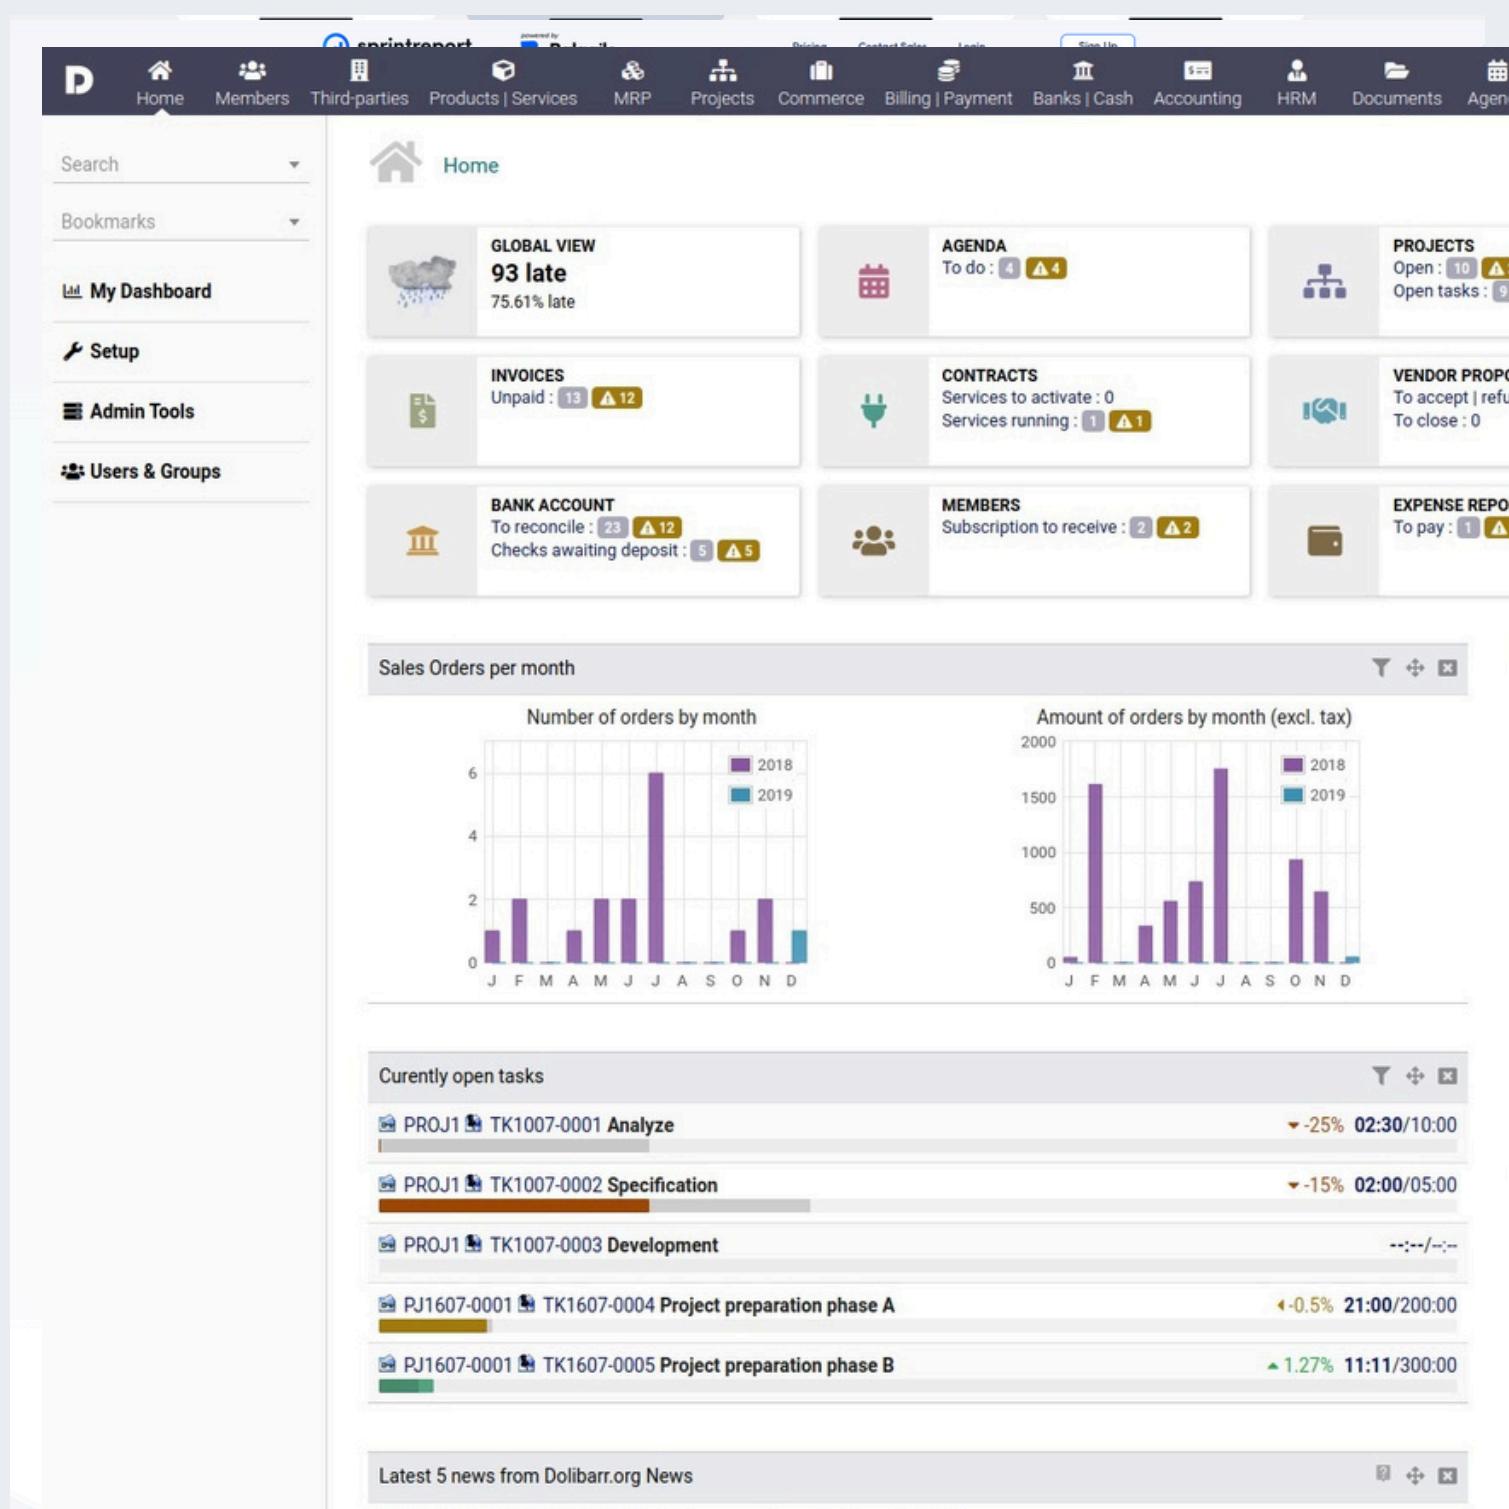

- Monolithic core refactored into modular MVC
- Role-based dashboards for analytics
- Redis caching for performance

Result:

Unified 5+ departments

70% faster reporting time

4.5★ user testing score

LEADVIEW CRM ANALYTICS DASHBOARD

INDUSTRY: SALES / CRM

TECH STACK

PHP (Laravel Blade) · TypeScript · PostgreSQL · Chart.js

Infrastructure

DigitalOcean Droplets + Docker

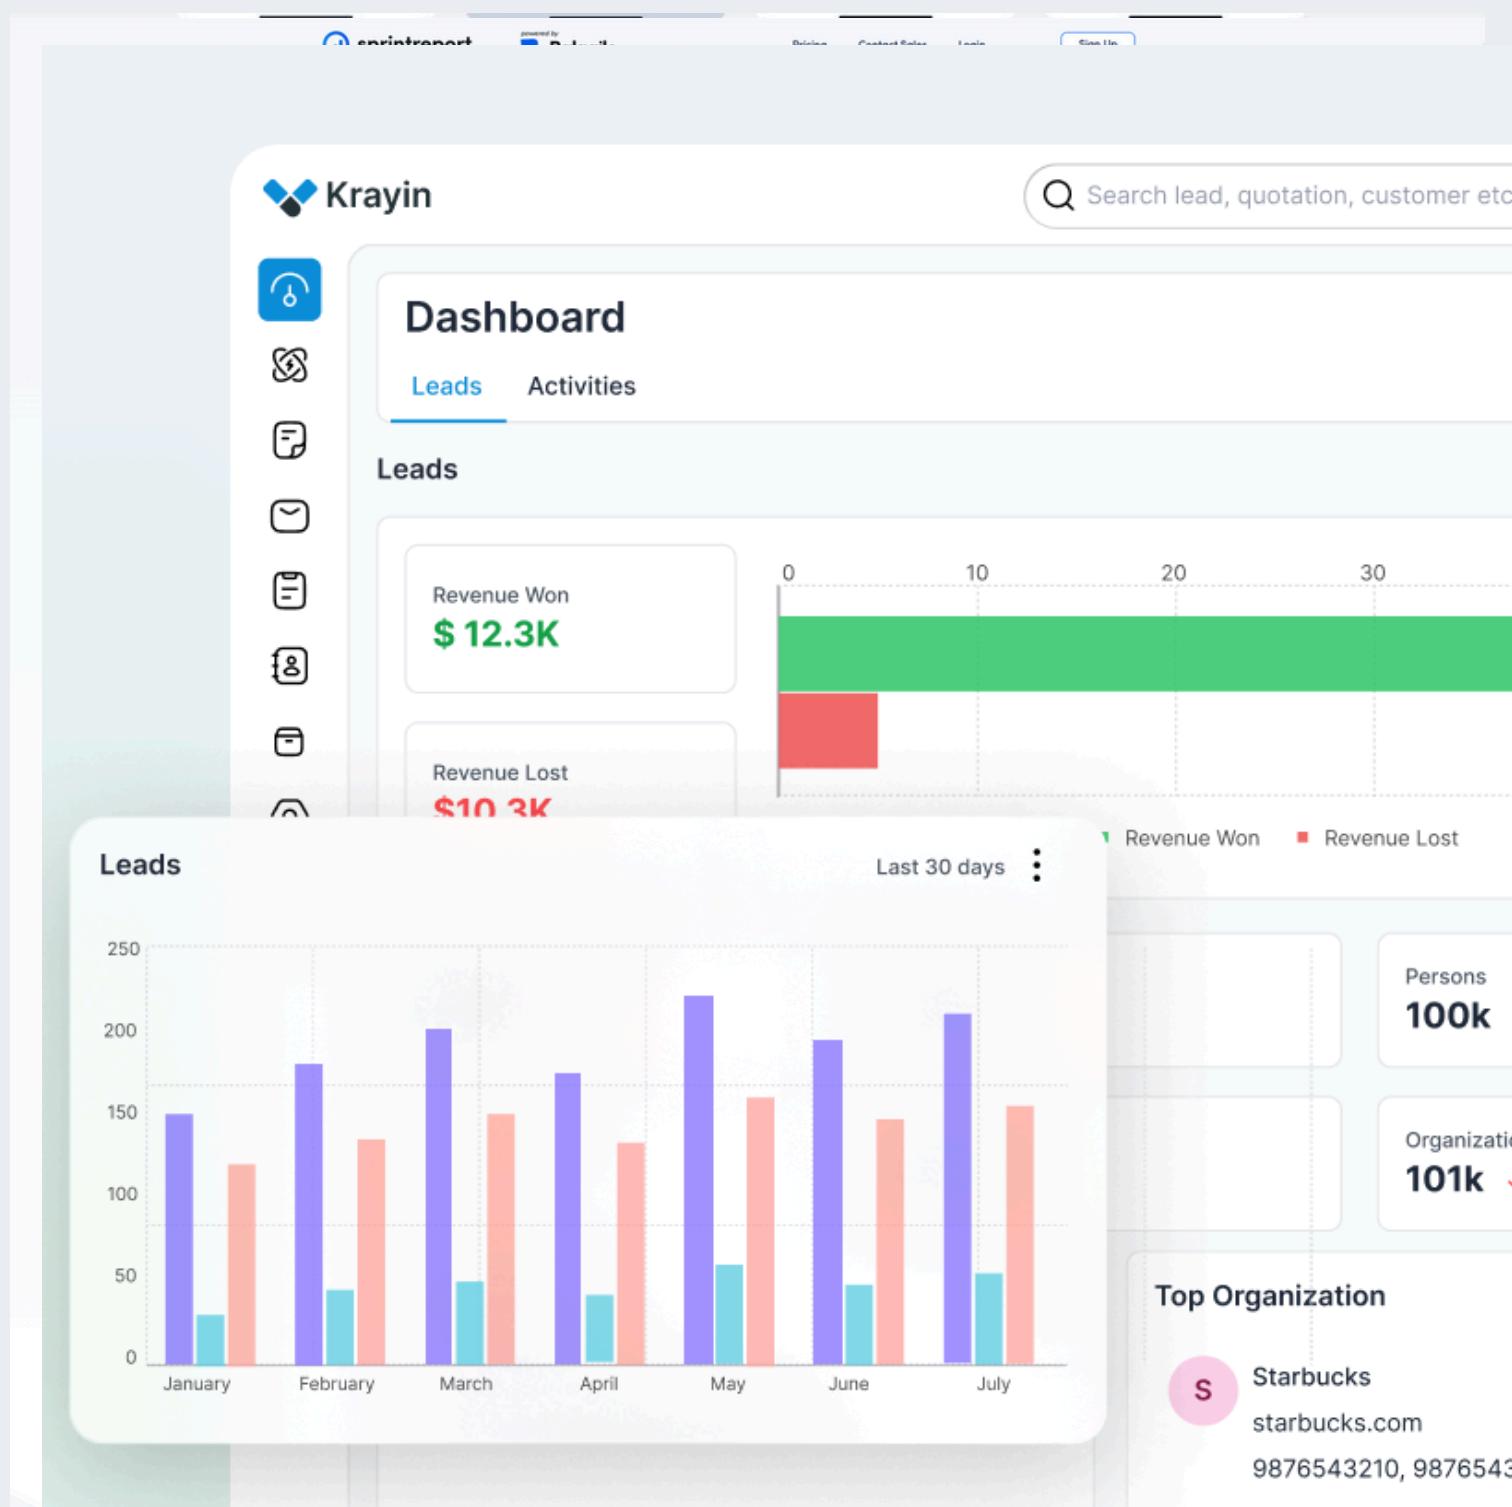

Architecture:

- Modular MVC with RESTful APIs
- Chart.js data visualization for KPIs

Result:

50% improvement in sales visibility and accuracy

4.5★ user testing score

Engineering Capabilities

Backend: C#, Java, Python, Node.js, PHP

Frontend: React, Next.js, Vue, Flutter

Databases: PostgreSQL, MySQL, SQL Server, MongoDB, Redis

Cloud & DevOps: AWS, Azure, GCP, Docker, Jenkins, GitHub Actions

Security: AES-256, 2FA, SSL/TLS, OWASP standards

We design systems ready for scale and long-term reliability.

LET'S BUILD TOGETHER

We work like an extension of your in-house team
technical enough for your CTO, accountable
enough for your CEO.
