

HABLTECH

HABLTECH BUILDING RELIABLE SOFTWARE WITH STARTUP PASSION

We're a team of experienced engineers, designers, and product thinkers who build systems that scale, perform, and last. Based in Karachi, working in sync with U.S. business hours.

Let's build something remarkable together.

OUR STORY

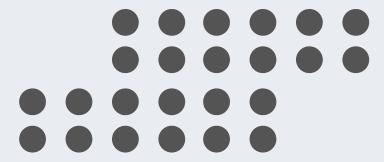

We started HablTech because we saw how many great ideas fail due to poor execution. Each of us came from years of enterprise and startup experience now united to build software that we can proudly sign our names under. We're not a big outsourcing firm. We're a high ownership engineering partner.

"Every project we take on is personal and that's our edge."

WHAT WE DO

Custom Software Development Scalable systems in C++, C#, Java, React, and .NET built to last.

Data Automation & Integration

Connect APIs, build pipelines, and automate workflows

MVP to Product Launch

From prototype to production, launch smarter and scale faster.

UI/UX Engineering

Clean, intuitive design that feels effortless.

"We don't build code. We build clarity."

HOW WE WORK

Discover & Define Understand goals, not just specs.

Architect & Design Build for scale and performance.

Build & Iterate Agile sprints with weekly demos.

Test & Validate Code reviews and QA.

Launch & Support Post-launch optimization and growth.

You'll always know where your project stands no surprises, no silence.

REAL PROJECTS REAL RESULTS

LibreBooking Reduced scheduling conflicts by 60%.
(C#, Java, Python)

Oalan 50K+ secure transactions/month with 99.9%
uptime. (Flutter, Node.js, AWS)

SprintReport 40% faster reporting via automated
dashboards. (React, PostgreSQL, AWS)

BizCore Unified operations, cut reporting time by 70%.
(PHP, MySQL, JS)

WHY U.S CLIENTS WORK WITH US

Clarity Transparent communication, native-level English.

Speed Aligned work hours + fast response time.

Accountability Weekly sprint updates, clear milestones.

Depth Full-stack expertise from C++ to Cloud.

Ownership Founders involved in every project.

"We work like your in-house tech team without the overhead."

TECH STACK

Languages: C++, C#, Java, Python, JavaScript

Frameworks: React, .NET, Node.js, Spring Boot, Flutter

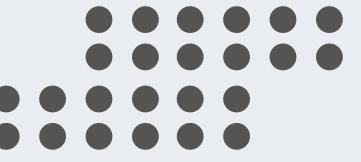

Databases: SQL Server, PostgreSQL, MySQL, MongoDB

Cloud: AWS, Azure, GCP

Tools: Docker, GitHub, CI/CD, Figma, Jira

We build stacks that power scale and reliability.

LET'S BUILD TOGETHER

We take on a few projects at a time because we believe in depth, not volume.

If you're looking for a technical partner who treats your product like their own you've just found your team.
