HABL TECH

WHERE INNOVATION MEETS EXCELLENCE

In a digital-first world, off-the-shelf solutions can limit your potential. HablTech builds custom software that transforms operations, engages customers, and drives measurable growth. We partner with you to engineer scalable, high-performance applications tailored to your unique business challenges.

OUR
EXPERTISE

Our expertise spans custom software, web, mobile, and desktop app development. We craft smart digital solutions that help businesses grow, streamline operations, and stay ahead of the competition.

MOBILE APP
DEVELOPMENT

Reach your users in their pockets with intuitive and robust mobile applications. We deliver seamless experiences across iOS and Android, from concept to launch.

- Native iOS & Android Development
- Cross-Platform Solutions
- User-Centered UI/UX Design
- App Store Deployment & Management

Our Stack: Swift, Kotlin, React Native, Flutter, Firebase, GraphQL, AWS Amplify.
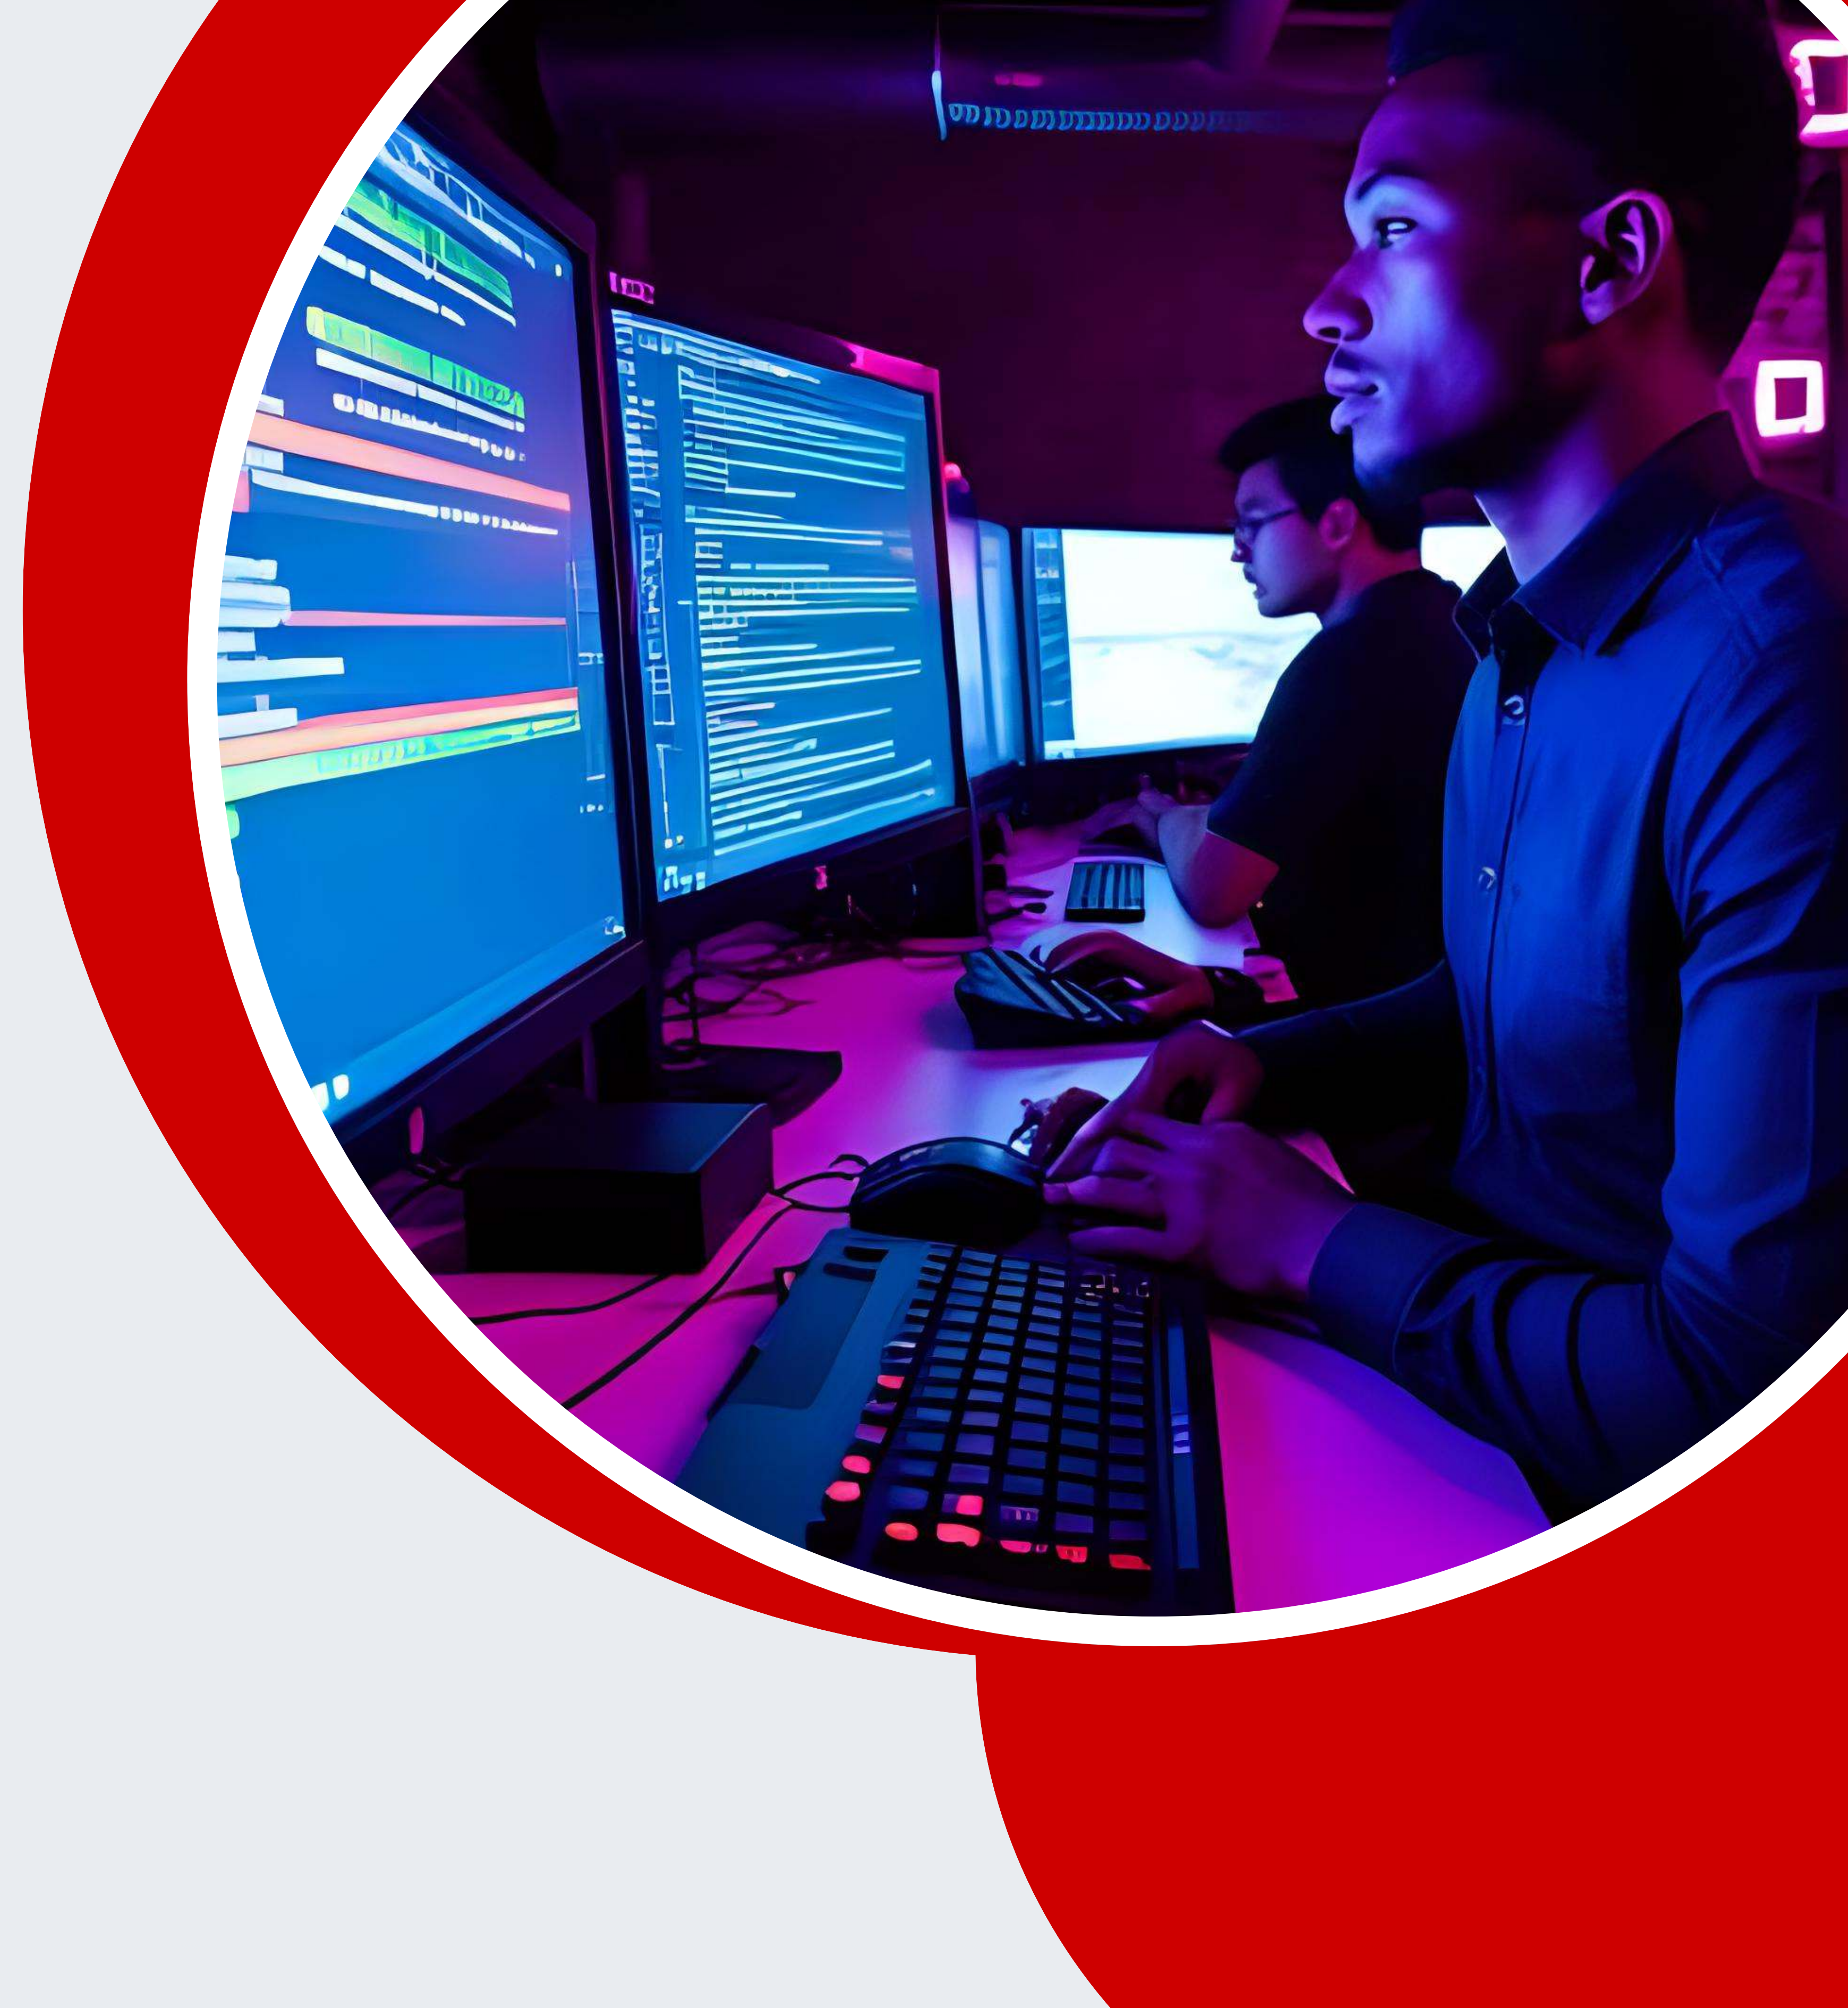

DESKTOP APPLICATION
DEVELOPMENT

Empower your team with high-performance desktop software. We develop secure, cross-platform applications that streamline complex workflows and integrate with your core systems.

- Custom Business & Productivity Tools
- Data-Intensive & Real-Time Applications
- Cross-Platform Compatibility (Windows, macOS linux)
- Legacy System Modernization

Our Stack: Electron, .NET MAUI, Java, Python, C++, SQLite.

CUSTOM ERP & BUSINESS DEVELOPMENT

Unify your operations with a tailored Enterprise Resource Planning system. We automate core processes—from supply chain to finance—to provide real-time visibility and drive efficiency.

- Process Analysis & Workflow Automation
- Integrated CRM, HR, and Finance Modules
- Real-Time Analytics & Reporting Dashboards
- Scalable & Modular Architecture

Our Stack: Odoo, Microsoft Power Platform, Python, Node.js, SQL, Power BI, Tableau.

SPECIALIZED SOFTWARE
& DIGITAL AUTOMATION

Solve unique challenges and pioneer new opportunities with cutting-edge technology. We develop bespoke solutions that set you apart.

- AI & Machine Learning Integration
- IoT & Connected Device Ecosystems
- Blockchain & Smart Contract Development
- API-First & Microservices Architecture

Our Stack: Python (TensorFlow, PyTorch), Go, Rust, IoT Platforms, Blockchain Protocols, Kubernetes, Docker.

THE HABLTECH
DIFFERENCE

Strategic Partnership
We don't just code; we collaborate to understand your goals and deliver a
solution with tangible ROI.

Engineering Excellence
Our team is proficient in modern architectures and agile methodologies, ensuring
quality and scalability.

Future-Proof Technology
We build with maintainable code and flexible frameworks, allowing your
software evolve with your business.

End-to-End Ownership
We guide you from initial strategy and design through development, deployment and
ongoing support
